

Purchase Request for Listed/Labeled Equipment

The vendor supplying electrical equipment to _____ should be aware of the certification requirements for electrical utilization agreement equipment in accordance with Federal and Local authorities. The equipment is required to be *listed* or *labeled* for Product Safety. The Vendor supplying the equipment is required to supply the equipment with the required certification or listing. In the case of unique, one of a kind equipment, the vendor agrees to bear the financial responsibility of a Field Evaluation to comply with the certification requirement after the equipment is delivered to _____. Alternatively, the vendor can contact an OSHA licensed Nationally Recognized Testing Laboratory (NRTL) to provide this certification or a Field Evaluation Body (FEB) to perform a field evaluation of the equipment prior to the equipment arriving at the site of final installation. The vendor agrees that the financial responsibility of the field evaluation will be supported by the vendor supplying the equipment to _____.

One local Field Evaluation Body that can provide this service is MET Laboratories. The Primary Contact for MET's Field Operations Department is Mike Baldwin – 410-949-1833 – mbaldwin@metlabs.com. You may also reach Valerie Boyd at 410-949-1925 – vboyd@metlabs.com .
